

DKF003A

Bottom Hemming (Knit-Twisting Reduction) Attachment

*Finishing quality with DKF003A
(Elastic fabric)*

*Finishing quality without DKF003A
(Elastic fabric)*

Effectively reduce twisting, misalignment and uneven stitches for hemming of elastics fabrics.

- Equipped with digitally controlled fabric pulling belt mechanism. Reduce twisting by synchronising fabric pulling speed with feed dog and pressor foot motions.
- Compact design, easy to install and introduce no obstruction to sewing operations.
- Provides memory function for speed settings.
- Suitable for sewing machine models from major brands like Pegasus, Hikari, etc.

APPLICATIONS

Size and Dimensions

Hemming Height:
≥ 13.5 mm

Curvature range of bottom

Height 5cm
Half circumference 50cm

Fabrications

No limitation, especially suitable for elastic fabrics
